

# Curl Power

While ENVY wigs are designed to hold their shade, shine, and shape, curls can loosen up slightly in transit.

To strengthen the curl pattern, place wig on a wig stand, mist with water, and gather the fibers into a hair net. Let dry before removing net and “scrunching” with fingers. (If you choose, you can finish with **ENVY Freeze Frame Hair Spray**—or any other spray designed specifically for your wig’s fibers.)
