

# Flip Tip

All ENVY ready-to-wear synthetic styles are made with 100% Kanekalon® fiber—renowned for holding its shade, shine, and shape. But not all styles are created equal.

To maintain the integrity of **Flip Styles**, hold your wig at the nape and comb upwards towards the crown, directing the ends outward for a turned-up appearance. (And use detangling sprays sparingly, as too much moisture can bring flipped-up ends down.)
