

# HEAT-STYLING WITH A BLOW DRYER

**Blow-dry it. Curl it. Straighten it. OWN IT!** EnvyHair's built-in moisture-control withstands temperatures UP TO **285°F (140°C)**—allowing you to make the style your own.

When blow drying EnvyHair™, always **MIST FIBERS FIRST**. The fiber's shape memory locks in as it dries and cools. So, the secret to styling EnvyHair™ is to have hair properly placed before drying/cooling.

Always use **MEDIUM HEAT** and use the **COOL SHOT BUTTON** to cool hair down. Press button long enough to allow heating elements to cool and ensure the air flow is **ROOM TEMPERATURE**.

**USE FINGERS** to direct fiber placement as you dry/cool wig. **DO NOT USE A BRUSH** when blow drying. It can stretch out EnvyHair™ fibers and **SHORTEN THE LIFE** of your wig.

If you want a **VOLUMINOUS BLOW-OUT LOOK**, hang the wig upside down to dry.
