

HEAT-STYLING WITH HOT ROLLERS

Blow-dry it. Curl it. Straighten it. OWN IT! EnvyHair's built-in moisture-control withstands temperatures UP TO **285°F (140°C)**—allowing you to make the style your own.

Secure your wig to a form with 2" T-pins, making sure **NOT TO PUNCTURE** any Lace or Monofilament material.

When styling, use sections that are the **SAME SIZE** as the roller. This ensures your style will be set in the desired direction and the heat will penetrate the hair fibers properly.

Rollers should be left in to **COOL COMPLETELY** or you can use your blow-dryer's **COOL SHOT BUTTON** to cool hair down.

Once completely cooled, **REMOVE ROLLERS** to reveal your new curl pattern.
