

HEAT-STYLING WITH A STEAMER

Blow-dry it. Curl it. Straighten it. OWN IT! EnvyHair's built-in moisture-control withstands temperatures UP TO **285°F (140°C)**—allowing you to make the style your own.

Secure your wig to a form with 2" T-pins, making sure **NOT TO PUNCTURE** any Lace or Monofilament material.

Use a small, hand-held steamer to concentrate the steam where you need it. Hold steamer **3-5" FROM WIG** and make sure **NOT TO OVERSATURATE** fibers.

MANIPULATE HAIR with fingers to achieve your desired style.

Leave your wig to **AIR DRY** or use your blow-dryer's **COOL SHOT BUTTON** to cool hair down and set style.
