(or watch the video at
envywigs.com)

out-of-the-box

1: natural beauty

AUBREY features a short, nape-hugging cut and a Mono Top construction and Hand-Tied sides and back that mimic hair's natural movement (no matter how you style it).

2: lush layers

EnvyHair's fiber memory locks in as it cools to hold its style longer—whether it's air- or blow-dried (using medium heat and the Cool Shot button).

STEP 1: Secure wig with 2" T-pins.

STEP 2: Determine desired part placement.

STEP 3: USE A 1" CURLING IRON SET TO **285°F (140° C)** and curl in 1" x 1" sections, away from parted area.

STEP 4: Continue along the hairline on both sides, eventually connecting to the back with a brick-lay pattern.

STEP 5: Allow hair fiber to cool 100% in the curled position.

STEP 6: Use **ENVY's Wide-tooth Comb** to achieve desired shape and style.

3: face framing

More durable than 100% human hair, AUBREY's heat-friendly EnvyHair™ blend cuts styling time in half—and can go curly, wavy, and back to straight again.

STEP 1: Using a 1¼" curling iron set on cool, curl 1½" x 1½" sections directed slightly back and away from part.

STEP 2: Allow each section to cool in hand to **LOCK IN THE CURL**.

STEP 3: For faster results, use a blow dryer set on cool/low air. This locks in a less uniform curl for a more relaxed look.

STEP 4: When the wig is fully curled, **ALLOW TO COOL COMPLETELY**.

STEP 5: Use **ENVY's Wide-tooth Comb** to create desired shape/style.

STEP 6: Set the curl with **ENVY Freeze Frame Hairspray**.
